## What's New In AutoCAD?

Add comments to drawings, or insert other shapes, and add comments directly to the parts of the drawing. Comments will show up in your edit window, ready to be discussed. Add comments in a text box, to make it easy to edit the comment from any position. Change shapes to other shapes and keep comments in sync. (video: 1:35 min.) AutoRevise and Auto-Collapse: Make your drawings more reliable, faster. AutoRevise helps you keep your drawings aligned and accurate, and detects the presence of mistakes when you have marked up parts of the drawing. Auto-collapse helps you detect drawings with parts that are cut off and automatically collapses those parts. Auto-collapse has been significantly improved and can now collapse almost all shapes in your drawing. Previewing with AutoBatch: Have your AutoCAD drawing done in less time, and have it available for additional design work. Preview a drawing without opening the drawing by using the AutoBatch command. Choose which drawings you want to preview. Changes you make on a previewed drawing are automatically applied to the live drawing.
