Category:Digital mappingQ: Rails 4.2 + CoffeeScript:

How to redirect? I am following a tutorial for set up CoffeeScript and Rails 4.2. All OK, I can actually use CoffeeScript. Now it is the demonstration of actions I can't use. I want to redirect, but I can't do that.

```
routes.rb get '/' do # @form =
```

```
  Form.find_by_id(params[:id]) redirect to
```

```
  '/thefolder/showform?id=id' # redirect to
```

```
  '/thefolder/showform?id=id' end I tried redirect to, but
```

I am getting a NoMethodError undefined method

```
  `find_by_id' for nil:NilClass show.js.coffee # ==
```

```
form_show.rb =====
```

```
===== # # A
```

form demonstrates the controller, model, view and routing that has been # built to support a Ruby on Rails framework. class FormDisplay # The id of the form to display. Can be named anything. # Change this to a route such as '/user/1' attr_accessor :id # Constructor

```
method that runs when object is instanced # This will
  look up the id from the params hash def
  initialize(attributes={ }) attributes[:id] = params[:id]
end # Called by the model controller when the id of the
  form is determined # Define the instance variables
  here def init @form = Form.find(id) end # Called
  from the view controller # Calls the model controller
def display @form = Form.find(id) end # Called from
the model controller # Redirects user to the show page
  of the form record def update if
  @form.update(params[:form]) redirect to
  '/thefolder/showform?id=@form.id' else render :action
  => 'edit' end end
```
