PocketSmith is a complete and professional personal finance application which is helping users to organize and forecast their future finances. What's more, it's free! Gain control over your budget and get accurate financial forecasts and forecasts for your cash flow at a glance. This is a fast-paced and highly customizable budgeting tool which is helping users to gain control over their expenses and predict their future financial situation. Step 1: Add your goals, priorities, income and spending patterns Please note that the app is compatible with a wide range of financial institutions from all over the world and can import CSV data directly from them. It is also possible to add your own financial transactions. Step 2: Enter your budget and forecasts Then, add your financial goals and your personal budget. There are two modes available, the Budgeting Mode and the Forecasting Mode. The Budgeting Mode is easier and includes two 'what if scenarios' and allows you to view your current cash flow, as well as forecast your balance over various timeframes (such as today, next month, next year, 10 years ahead, 20 years ahead, etc.). The Forecasting Mode has all the features of the Budgeting Mode, as well as additional ones including advanced budgeting features, forecasts and the opportunity to create unlimited budget scenarios. Step 3: View your cash flow You are offered a calendar view with all the upcoming bills and one-time expenses and your cash flow. The income section tracks your scheduled incomes, the expenses section provides a detailed list of scheduled bills, your savings accounts, etc. Step 4: Set up alerts PocketSmith allows you to get real-time alerts for your cash flow. This is a great feature, especially when you want to avoid making payments on expensive bills and when you want to set up savings accounts. Step 5: Export reports You can easily export your data to a CSV file for your further use and analysis. You can check out PocketSmith's features and full capabilities via its website: Visit PocketSmith's official Facebook Page: This post is part of the 2013 Blogging Around The Globe series. The web-based applications of today and tomorrow often come with a significant amount of technology, some of which is referred to as the 'technical debt' due to the fact that it was added to the project at a very late stage. So often, a web
