Automation of drawing features Customization of drawing features Extensibility (many add-on applications and products) SVG support Field extension Plugins can be distributed within AutoCAD using the Autodesk Exchange app store and can also be distributed by other means. AutoCAD 2017 (and AutoCAD LT 2017) came with a custom Linux-based app store that can be used to install third-party extensions. Autodesk Exchange Apps can be installed via the Windows AutoCAD App Launcher, installed via a MSI Windows Installer package, or distributed via a disk image. AutoCAD and AutoCAD LT have been distributed in the past in both a customized version for installing third-party add-ons as well as a distribution version with all the add-ons bundled within the installation package. An installer is included with the primary AutoCAD and AutoCAD LT installation for a customized installation of third-party add-ons. The packaged installation includes all of the AutoCAD/AutoCAD LT and third-party software which is pre-installed. An AutoCAD installation also includes the ability to install third-party add-ons and the installer can be used to install other versions of AutoCAD. Programmers can create plug-ins in C++ using a Visual Studio package or the Visual LISP compiler to convert the source code to an executable. AutoCAD plug-ins can be extended with scripting language extensions that support AutoLISP, Visual LISP or Visual Basic.NET. Plugins in AutoCAD and AutoCAD LT can be classified into two categories: Non-programming extensions. This category of extensions are used to add a particular feature or to modify the behavior of the drawing components. They are typically written in C++. Programming extensions. The programming extensions, which are based on the ObjectARX class library, are used to develop applications to run in AutoCAD that provide additional drawing components. They are written in C++. Plugins can be distributed via Autodesk Exchange Apps. History AutoCAD started as "AutoPlanner," a drafting application for drafting airplane design. The company eventually adopted an acronym for AutoCAD: "automated computer-aided design." From a commercial product, the company developed the original AutoCAD as a free-for-home personal computer (PC) program. In the late 1980s, a1d647c40b
